- Azzedine-prog

COMPETENCES

- LANGAGE C,PYTHON, JAVA.
- Autosar
- ÉLECTRONIQUE ANALOGIQUE.
- MICROCONTROLEUR : MICROSHIP PIC. o STM32. o DSP.
- Cartes de développement : ARDUINO. RASPBERRY PI. DSP,STM32F4(Cortex-m4).
- INTEL FPGA-DE1.
- PROTOCOLES DE RÉSEAU : MQTT.
- Logiciel : PROTEUS. ORCAD .KEIL-uvision . ARDUINO IDE
- LINUX EMPBARQUE.
- MODEL BASED DESIGN.
- COMMUNICATION SERIE : UART-SPI .I2C.CAN
- V cycle process
- ISO26262 Standard

CERTIFICATS

- Artificial Intelligence and IoT: Naive
- Bayes
- Raspberry Pi: GPIO
- Learning FPGA Development
- L'essentiel d'Assembleur
- Advanced C Programming:
- Integrating C and Assembly Language

LANGUES

- Arabe : courant
- Français : Bilingue
- Anglais: Courant
- Amazigh: Langue maternelle

AZZEDINE LAKHDAR

Embedded Systems and Digital Services Development Engineer

EDUCATION

2019-2022 :INPT

Embedded Systems and Digital Services Development Engineer

2016-2019 :CPGE REDA SLAOUI D'AGADJR

Cycle des classes préparatoires aux écoles d'ingénieurs option:MPSI/MP

PROFESSIONAL EXPERIENCE

Stage PFE :(effectuer un cycle en V pour les composants logiciels des feux arrières de sécurité)

du 14 février au 14 juillet: à LEAR Corporation

- Mission : develop the software needed for three features : for controlling rear break lights , rear turn indicator lights and rear position lights following the V cycle process and respecting ISO26262 Functional Safety standard requirements.

Stage PFA :(conception de machine de pesage par mcu Cortex-m4) du 1 août au 1 septembre à Meetek

- Design and manufacture of a digital scale.
- export a signal between 0 and 10 volts linked linearly to the weight and modbus communication with microcontroller based on Cortex arm m4.

ACTIVITÉS PARASCOLAIRES

2021:chef de cellule du club robotique cese inpt : club électronique et systèmes embarqués rabat, maroc

2019:membre actif en club des affaires sociales.

ACADEMIC PROJECTS

Smart Full parking (October 2020)

- an Arduino-based system managing paid parking for the company.

Stopwatch with FPGA (November 2020)

- realization of a digital chronometer with FPGA .

Smart Store (November 2021)

- Realization of a smart store.
- GUI by raspberry pi.
- management of a rolling cart by arduino uno.
- management of store items by stm32.
